v24.10.15

Tags: ERGA-BGE

TxID	159417
ToLID	<b>kaClalepa1</b>
Species	<i>Clavelina lepadiformis</i>
Class	Asciidiacea
Order	Aplousobranchia

Genome Traits	Expected	Observed
Haploid size (bp)	191,230,229	218,900,232
Haploid Number	9 (source: direct)	9
Ploidy	2 (source: direct)	2
Sample Sex	Hermaphrodite	Hermaphrodite

## EBP metrics summary and curation notes

Obtained EBP quality metric for hap1: 6.7.Q65

Obtained EBP quality metric for hap2: 6.7.Q65

The following metrics were automatically flagged as below EBP recommended standards or different from expected:

- . Assembly length loss > 3% for hap2
- . Not 90% of assembly in chromosomes for hap2

## Curator notes

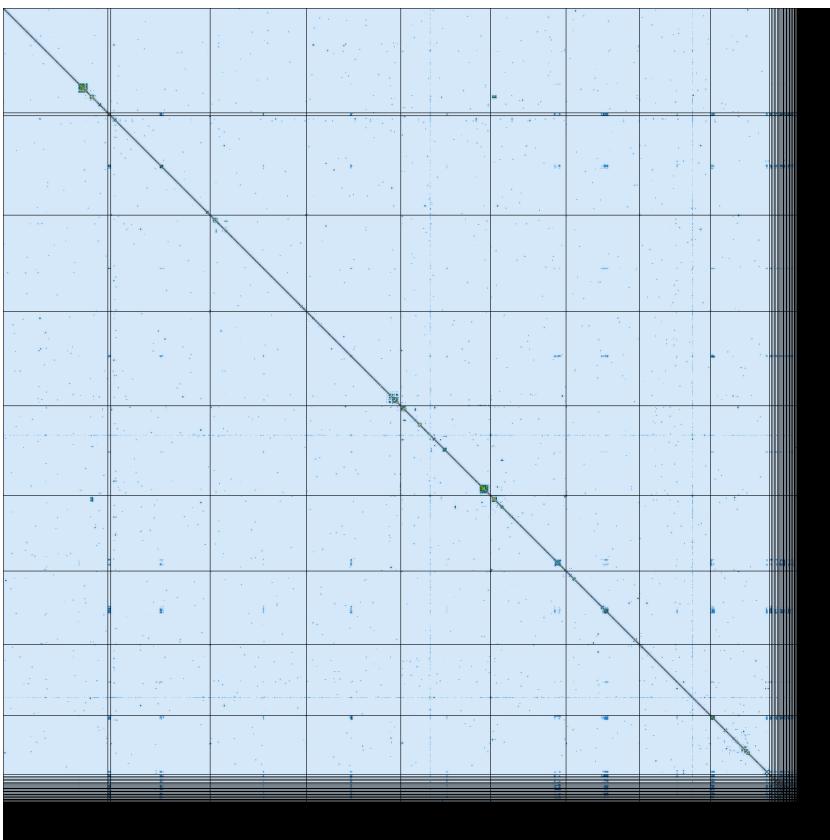

- . Interventions/Gb: 107
- . Contamination notes: "The organism was moderately contaminated. Initial screening was performed with Tiara and BlobToolKit. Those contaminants were identified in the Hi-C contact map and clustered with other contigs showing high contact frequency. These blocks, along with other contigs showing minimal contact frequency to the primary scaffolds, were removed from the assembly."
- . Other observations: "The Hifi data was subsampled to 130x, which improved contiguity and reduced contamination. The Sanger Hi-C library (ERR10501018) was used for scaffolding and manual curation after the SciLifeLab library proved insufficient. SciLifeLab data was subsequently remapped for final validation. Because the Sanger library used a different individual, signal breaks within contigs were ignored to prioritize HiFi data accuracy. The SciLifeLab library was used primarily for contamination checks. The pretext file of Sanger Hi-C against the Hifi is also in <https://export.uppmx.uu.se/snics2021-6-194/ERGA/kaClalepa1>"

# Post-curation contamination screening

**hap1.** Bubble plot circles are scaled by sequence length, positioned by coverage and GC proportion, and coloured by taxonomy. Histograms show total assembly length distribution on each axis.

**hap2.** Bubble plot circles are scaled by sequence length, positioned by coverage and GC proportion, and coloured by taxonomy. Histograms show total assembly length distribution on each axis.
